

Kelly Tierney

I graduated from the University of Wisconsin Stevens Point in 2006 with a Bachelor's in Psychology and have 15 years of experience in the health and human services field. I have worked as an Employee Development Counselor for adults with mental illness and developmental disabilities, an Adult Rehabilitative Mental Health Worker, and as a CADI and BI Waiver Case Manager and it was in this role that I was introduced to CDCS. When I'm not working you'll find me spending time with my family, biking around the lakes, or gardening.
